

Project Design Phase-II

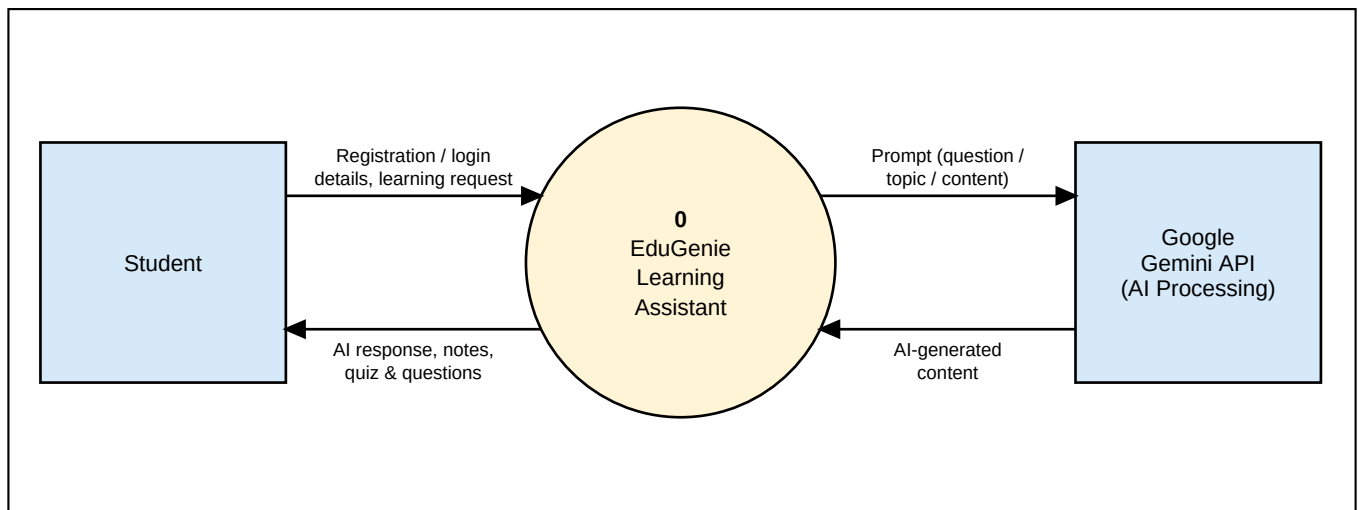

Data Flow Diagram & User Stories

Date	01 October 2026
Team ID	SWTID-2026-1665
Project Name	EduGenie – Google Gemini Powerful Learning Assistant
Maximum Marks	4 Marks

Data Flow Diagrams:

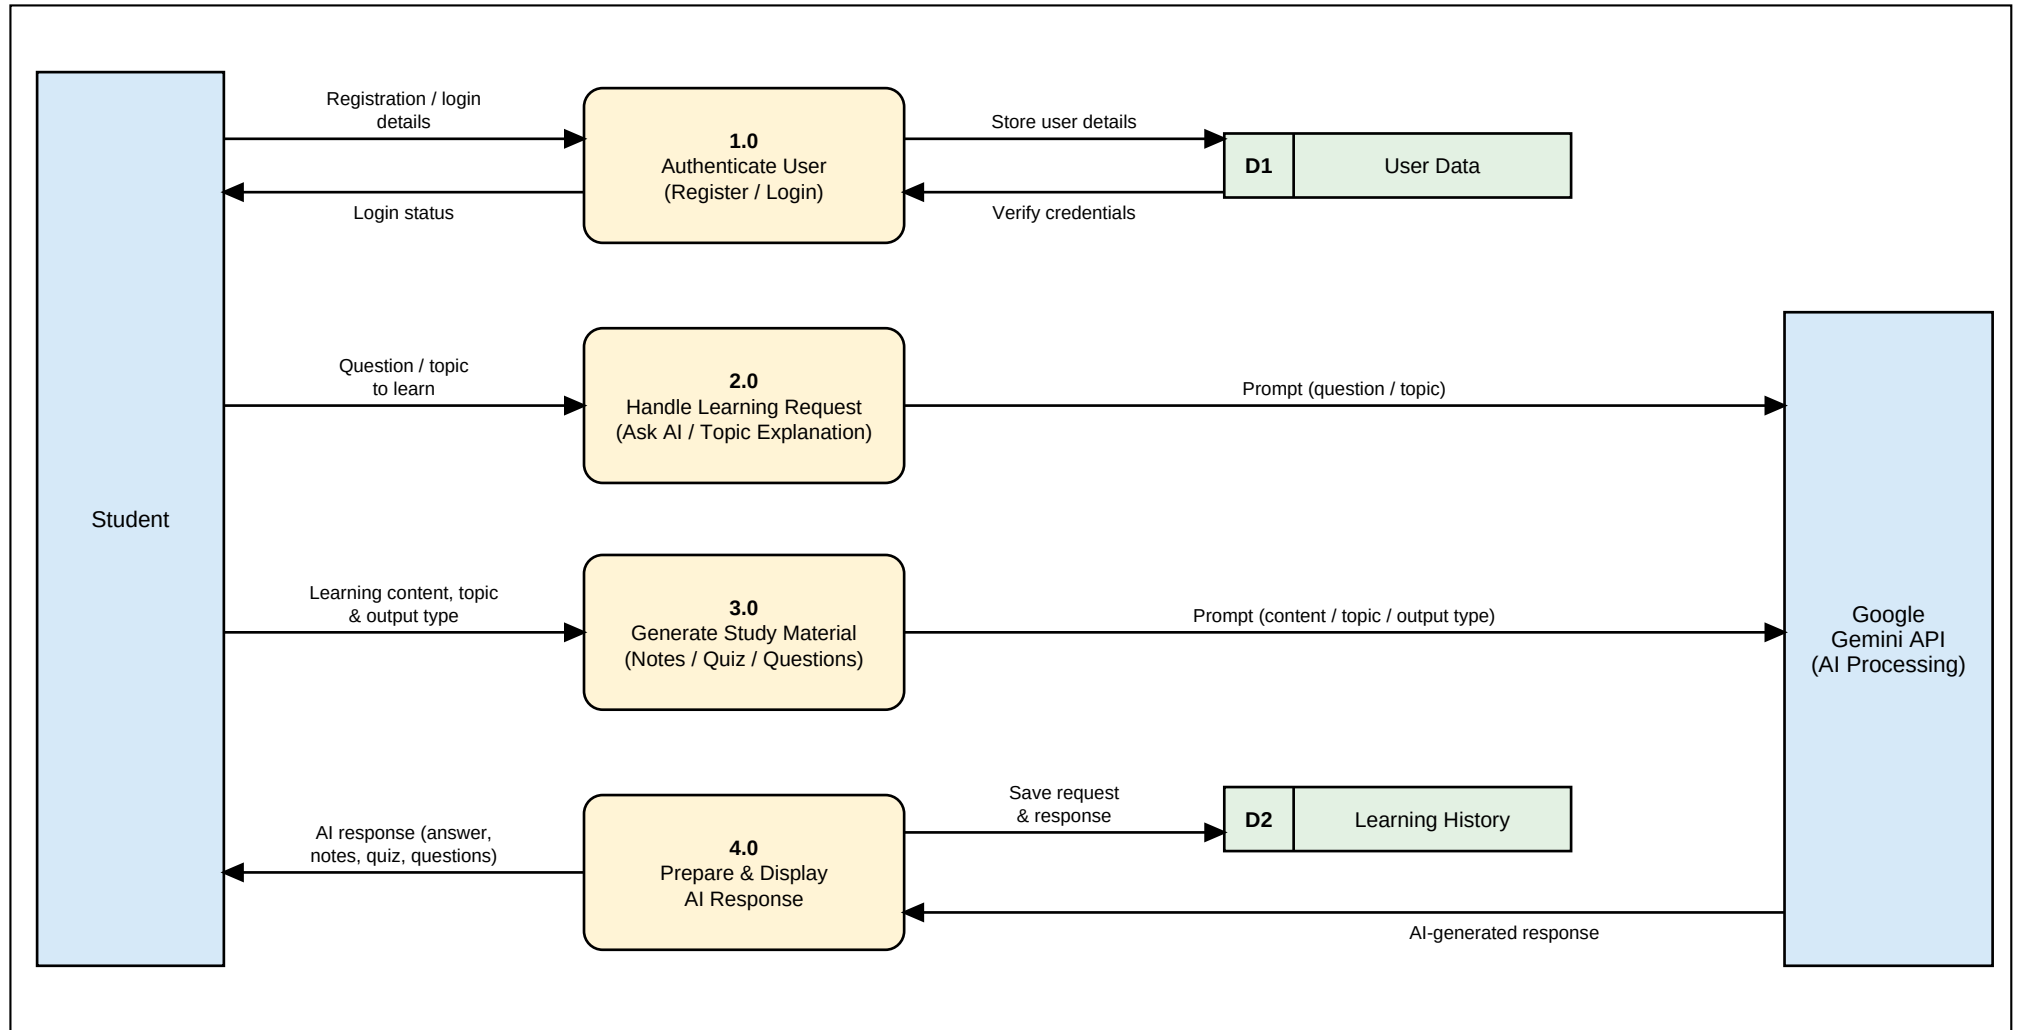

A Data Flow Diagram (DFD) is a visual representation of how information flows within a system. It shows how data enters and leaves the system, which processes change the data, and where the data is stored. For EduGenie, the DFDs show how a student's requests move through the application, are processed by the Google Gemini API, and return as learning content.

DFD Level 0 (Context Diagram) – EduGenie

Notation: rectangle = external entity; circle = system process; arrow = direction of data flow.

DFD Level 1 – EduGenie

Notation: rectangle = external entity; rounded rectangle = process; box with ID = data store; arrow = direction of data flow.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Student	User Registration / Login	USN-1	As a student, I want to register for EduGenie so that I can access the learning assistant.	Student can enter valid registration details and create an account.	High	Sprint-1
Student	User Registration / Login	USN-2	As a student, I want to log in to EduGenie so that I can access my learning features.	Student can log in with valid credentials and reach the home page.	High	Sprint-1
Student	AI Learning Assistant	USN-3	As a student, I want to ask questions to the AI assistant so that I can understand difficult topics.	Student can submit a question and receive an AI-generated answer, and can ask follow-up questions.	High	Sprint-2
Student	Topic Explanation	USN-4	As a student, I want to enter a topic and receive a simple explanation so that I can understand it easily.	Student can enter a topic and get a simple explanation, with a detailed one on request.	High	Sprint-2
Student	Notes / Summary Generation	USN-5	As a student, I want to generate short notes from learning content so that I can revise quickly.	Student can provide content and receive short notes with important points.	Medium	Sprint-3
Student	Quiz Generation	USN-6	As a student, I want to generate quiz questions from a topic so that I can practice.	Student can enter a topic and receive MCQs with correct answers and explanations.	Medium	Sprint-3
Student	Question Generation	USN-7	As a student, I want to generate practice questions so that I can prepare for examinations.	Student can enter a subject or topic and receive practice questions of different types.	Medium	Sprint-3
Student	AI Learning Assistant	USN-8	As a student, I want to view the generated response clearly so that I can use it for learning.	Generated response is displayed in a clear, readable format on the screen.	High	Sprint-2
