

Project Demo Planning

Date	2 October 2026
Team ID	SWTID-2026-1665
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	1 Mark

Project Demo Plan:

The demo will present EduGenie as an AI-powered learning assistant designed to support students through interactive Q&A, simplified explanations, summarization, quiz generation and personalized learning recommendations. The demonstration will follow a clear user journey from selecting a learning task to viewing the generated educational result.

Demo Objectives:

S.No	Objective	Demonstration Focus	Expected Result
1	Show Core Features	Demonstrate Q&A, simplified explanation, summary, quiz generation and learning recommendations.	Evaluator can observe the complete learning functionality.
2	Show AI Integration	Use Gemini 1.5 Pro for Q&A, summaries, quizzes and learning paths, with LaMini-Flan-T5-783M for explanations.	Relevant AI-generated learning responses are displayed.
3	Validate User Flow	Select a task, enter a question or learning content, submit the request and review the result.	The workflow is clear, responsive and easy to follow.
4	Explain Implementation	Present the FastAPI backend, responsive HTML/CSS interface and documented API endpoints.	Evaluator understands the system structure and integration.

Demo Execution Flow:

S.No	Demo Stage	Action / Content to Demonstrate	Expected Output
1	Introduction & Interface	Introduce EduGenie and show the main interface with Explain, QnA, Quiz, Summary and Recommend Path options.	The evaluator understands the purpose and available features.
2	Q&A; & Explanation	Ask “Which is the largest ocean?” and demonstrate a learner-friendly explanation for a concept.	A concise answer and simplified explanation are displayed.
3	Summary & Quiz	Submit study content for summarization and demonstrate quiz generation using “Pythagoras Theorem”.	A summary and a generated multiple-choice quiz are returned.

Project Demo Planning

4	Learning Path	Request a learning path for SQL and demonstrate the recommended progression from beginner to advanced topics.	A structured learning recommendation is displayed.
5	Conclusion & Review	Review the demonstrated features, technical stack, API functions and local execution requirements.	The evaluator receives a complete overview of functionality and implementation.

Demo Scenarios:

S.No	Scenario	User Action	Expected Result
1	General Q&A;	Enter: "Which is the largest ocean?"	EduGenie returns an AI-generated answer through the Q&A; module.
2	Concept Quiz	Select Quiz and use "Pythagoras Theorem" as the topic.	Three MCQs with four options each are generated with feedback for incorrect selections.
3	Learning Recommendation	Request a learning path for SQL.	A structured beginner-to-advanced learning path with suggested resources is provided.

Technical & Demo Readiness:

Item	Details	Demo Requirement	Status
Application Stack	FastAPI + Uvicorn backend with responsive HTML/CSS frontend.	Start the application before recording the demo.	Ready
AI Components	Gemini 1.5 Pro API and LaMini-Flan-T5-783M.	Confirm the required Gemini API configuration.	Ready
API Functions	/qa, /explain, /quiz, /summarize and /learn/recommendations.	Verify each demonstrated function returns its corresponding result.	Ready
Local Execution	uvicorn main:app --reload; http://127.0.0.1:8000	Confirm the interface loads and core workflows operate.	Ready

Demo Notes:

The demonstration should remain aligned with the documented EduGenie implementation. The demo should show the working interface, core learning workflows, AI integration and local execution. AI-generated responses should be reviewed for accuracy during the presentation.
