

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	01 October 2026
Team ID	SWTID-2026-1665
Project Name	EduGenie – Google Gemini Powerful Learning Assistant
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration / Login	Student registration through a sign-up form Login with registered credentials Basic user authentication to access the application
FR-2	AI Learning Assistant	Ask learning-related questions Receive AI-generated answers from Google Gemini Ask follow-up questions on the same topic
FR-3	Topic Explanation	Enter a topic to learn Get a simple explanation of the topic Get a detailed explanation if required
FR-4	Notes / Summary Generation	Enter or paste learning content Generate short notes from the content Generate a list of important points
FR-5	Quiz Generation	Select or enter a topic Generate multiple-choice questions (MCQs) Display correct answers with explanations
FR-6	Question Generation	Enter a subject or topic Generate practice questions Support different question types such as short-answer and descriptive

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple, user-friendly interface with easy navigation, so students can use all learning features without difficulty.
NFR-2	Security	Secure user authentication; user information and Gemini API credentials are protected from unauthorized access.
NFR-3	Reliability	Provides consistent responses and handles invalid or empty inputs appropriately with clear messages.
NFR-4	Performance	Delivers responses within a reasonable time through efficient communication with the Gemini API.
NFR-5	Availability	Accessible whenever the Gemini service and the user's internet connection are available.
NFR-6	Scalability	Supports a growing number of users and learning requests without affecting normal operation.
