

PROJECT EXECUTABLE FILES

EduGenie: Google Gemini Powered Learning Assistant

Date	2 October 2026
Team ID	SWTID-2026-1665
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section provides the executable and deployable project information for EduGenie. The content has been prepared from the supplied EduGenie project documentation and the provided Project Executable Files template.

Step 1: Submission Checklist

S.No	Item to Submit	Status / Details
1	Complete source code (all files and folders)	Documented project source structure
2	README / Setup Guide (instructions to run the project)	Setup and run instructions documented
3	requirements.txt / package.json / dependency file	requirements.txt documented
4	Database schema / seed files (if applicable)	Not applicable / not documented
5	Environment configuration file (.env.example or similar)	Not documented
6	Deployed application URL (if hosted)	Not provided in project documentation
7	APK / Executable binary (if applicable for mobile/desktop apps)	Not applicable
8	Dockerfile / Containerization config (if applicable)	Not documented
9	Test files and test results	Functional testing activities documented
10	Demo video or walkthrough (if required)	Not provided in project documentation

Step 2: File / Folder Structure

```
EduGenie/
├── main.py
├── explanation_module.py
├── qna.py
├── quiz_module.py
├── summary_module.py
├── learning_path.py
├── requirements.txt
├── templates/
│   └── index.html
└── static/
    └── style.css
```

The documented architecture uses FastAPI for the backend and a simple HTML/CSS frontend. Separate modules implement concept explanation, Q&A, quiz generation, summarization, and learning recommendations.

Step 3: Deployment / Access Details

Field	Details
Application	EduGenie: Google Gemini Powered Learning Assistant
Deployment / Access	Local execution documented
Local URL	http://127.0.0.1:8000
Hosting Provider	Not provided in the documentation
Public Deployed URL	Not provided in the documentation
Login Credentials	Not documented
Repository Link	Not provided in the documentation
Demo Video Link	Not provided in the documentation

Step 4: Run Instructions

Pre-requisites:

- Python 3.10+
- FastAPI Framework
- HTML & CSS
- Google Gemini API Key
- Uvicorn (ASGI Server)
- Jinja2 (HTML Templating Engine)

1. Install Python 3.10+ and verify it using `python --version`.
2. Install the required dependencies from `requirements.txt`.
3. Create/configure a Google Gemini API key as described in the project documentation.
4. Start the application using: `uvicorn main:app --reload`

5. Open the application at <http://127.0.0.1:8000>.

6. Perform functional checks: ask a question, explain a topic, generate a quiz, summarize content, and get a personalized learning plan.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI-generated response accuracy	Accuracy of generated responses must be considered during use.
2	Gemini API dependency	Q&A, quiz, summarization and learning-path functions require the Gemini API.
3	Performance across devices	The documentation identifies device performance as a development consideration.
4	Data privacy	The documentation identifies data privacy as a challenge to address.
5	Future enhancements	Voice interaction, multilingual support, mobile/offline access, progress dashboards, gamification, adaptive learning, LMS integration, image/PDF input, real-time sync and notifications are described as future possibilities.

Core documented features: Q&A, simplified explanations, quiz generation, summarization, and personalized learning recommendations.

AI models documented: Gemini 1.5 Pro for Q&A, summarization, quiz generation and learning paths; LaMini-Flan-T5-783M for concept explanation.

Prepared using the supplied Project Executable Files template and EduGenie project documentation.
